DESIGNED FOR THE FUTURE

BEYOND RETRO COLLECTION

INSPIRED BY THE PAST DESIGNED FOR THE FUTURE

The Beyond Retro collection is celebrating a milestone in the parquet history.

It is amazingly 80 years since Kährs was awarded the patent for the engineered lamella parquet flooring, an innovation that revolutionized the parquet flooring industry.

As a true design-oriented company, we wanted to create a high design collection to celebrate the combination of classical and modern elements, with a sense of authenticity, warmth and modernity.

Kährs Beyond Retro is a unique collection of silky, soft muted colors. Based on natural colors we have developed six unique stains all with a warm, deep, silky, velvet and ultra-matt expression. The Retro style interior has a nostalgic feature which we wanted to be reflected in the color palette of this high design collection.
